

What is a Bionic Pancreas?

It's the future of insulin therapy.

No more:

- ⊘ Carb counting*
- ⊘ Carb ratios
- ⊘ Correction factors
- ⊘ Pre-set basal rates

or any of the other settings that might be overwhelming about other insulin delivery devices.

The iLet only needs one number - your weight.

After startup, the iLet learns about your basal insulin needs, how to correct you to target, and how much insulin you really need for meals — no more guessing!

Based on clinical trial results, adults using the iLet could experience almost 1,000 extra hours of time in range each year.¹

Safety Information

The iLet® Bionic Pancreas System is indicated for use by people with type 1 diabetes 6 years of age and older. The iLet Bionic Pancreas requires prescription by a physician. Refer to the iLet Bionic Pancreas System User Guide at www.betabionics.com/user-guides, or for complete safety information including indications, contraindications, warnings, cautions, compatible devices, compatible drugs and instructions, refer to www.betabionics.com/safety. DO NOT start to use the iLet Bionic Pancreas System without adequate training. Incorrect use may result in over-delivery or under-delivery of insulin, which could lead to hypoglycemia or hyperglycemia.
